

# ANDREA SUPERSTEIN: OH MOTHER

9th February 2024

*Oh Mother* was inspired by Vancouver vocalist and composer [Andrea Superstein's](#) own experience as a mother. Between the trauma of birthing a baby and all of the physical changes a mother goes through, coupled with balancing a job, feeling out your new role and your place within the world: contrary to popular belief, mothering can be a very isolating experience.

the times or just hers alone? Superstein interviewed close to 100 mothers to get at the root of motherhood. What were the common experiences, and why were people so afraid or unable to speak their truth?

Based on these conversations she wrote music: some songs are one person's story, others are of the collective consciousness. Some a stark look at loss, others describe the heart-exploding feeling a parent can have towards their child. The album represents how all of these opposing feelings can coexist and shines a true light on the complicated, delicate, beautiful, traumatic and messy journey that is motherhood.

As a singer "redefining jazz," Andrea is one of the most versatile voices in music today. *Oh Mother* is an ambitious tour de force highlighting her ever growing creativity and sensitivity as a songwriter and arranger. Expect powerful vocals, evoking the gentle and the strong, lithely navigating the colours of the emotional spectrum.

*Oh Mother* will be released worldwide on Friday, February 9th, 2024 on Cellar Live.
